Subject: English DOC's or TFPCX(To run Baycom)

I'm interested in trying to write up some stuff for the baycom modem, and thing
think that the TFPCX drive would do the trick for the programs, BUT! the docs
I have are in German, and I can't figure out a words as to what the calls he
needs to have the program call up the driver.

Can ANY HELP me PLEASE !

The title says it all.
Can anyone point me to a ftp site with TPK 1.82.

Thanks in advance.

Subject: Satellite to Internet?

Would like to know if there is a program or script that will
link the satellite packet with an internet node...

Subject: Trio (Kenwood) TR-9000 Mods?

Hi, John from Canberra - Australia here.
requesting information on mods available for the above radio to allow
its use for packet (4800bd and above). Have installed some mods and
transmit seems O.K. at 4800, but reception seems very dependent on
the transmitting station. Have tapped after the demod circuit having
changed the first filter to a higher cut-off frequency. Still have
to de-tune the input to the demod substantially to get good decode.
This means radio becomes more deaf to distant stations, so I could
step on them.
So--- if you have a mod, please let me know - would also like to get
a copy of the service manual for this rig if anyone has.
